

Vacuum generators OVEL

FESTO

Key features

At a glance

Rapid purging of vacuum for safe placement of the workpiece by a solenoid valve to control the ejector pulse, optional

Flow control screw to adjust the ejector pulse

Electrical connection via H3 plug

Fast vacuum build-up using a solenoid valve to control the compressed air supply

Supply port, secured with clamping clip

Additional compressed air port for the separate supply of the ejector pulse, optional, secured with clamping clip

Pressure transmitter SPTE/pressure sensor SPAE for monitoring the vacuum, optional, secured with clamping clip

Maintenance-free operation and reduced noise level with an open silencer, optional

Vacuum generator cartridge, secured with clamping clip

Vacuum connection, secured with clamping clip

Housing with mounting holes

The compact vacuum generator

OVEL → page 3

- Low-cost, compact vacuum generator
- Low weight
- Various performance levels and vacuum types
- Short switching times thanks to integrated solenoid valves
 - Vacuum on/off
 - Ejector pulse
- Easy to install using H3 plugs and push-in fittings
- Straightforward mounting with retaining screws

- Quiet operation thanks to integrated silencer
- Integrated filter
- Reduced contamination of the vacuum generator thanks to an open silencer
- Solenoid valves are switched by mechanical manual override
- Monitoring of the vacuum by a vacuum sensor
- Link up to 8 vacuum generators on a single common supply manifold.

OVTL → ovtl

The vacuum generator OVTL is a configurable module comprising vacuum generator OVEL, the common supply manifold OABM-P and connection accessories.

All products are available from the factory fully assembled.

Functional principle of OVEL

Vacuum ON/OFF

The compressed air supply is controlled by a solenoid valve. The solenoid valve can be supplied with the N/C (normally closed) switching func-

tion, i.e. the vacuum is not generated until the vacuum generator is pressurised with compressed air and the solenoid valve has been switched.

Optional ejector pulse

After the vacuum is switched off, an ejector pulse is activated and generated by a second solenoid valve to release the workpiece safely from the suction cup with connection and to purge the vacuum quickly.

The compressed air for the ejector pulse can be supplied either via the supply port or a separate connection.

Vacuum sensor, optional

The set or taught-in setpoint value for the generated vacuum is monitored by a vacuum sensor.

If the setpoint value is reached or if it is not reached due to malfunctions (e.g. leakages, dropped workpiece), the vacuum sensor emits an electrical signal.

OVEL...-V1B/V1V/B2B/B2V:

Pressure transmitter SPTE with an analogue output (→ page 17). Detection of analogue signals and conversion into digital signals with downstream signal converter SCDN with LCD display (→ page 22).

OVEL...-V1PNLK/B2PNLK:

Pressure sensor SPAE with various switching outputs and LCD display, IO-Link® and teach-in function (→ page 19).

Accessories

Common supply manifold OABM-P

For vacuum generator
OVEL-...-P

- Up to 8 vacuum generators OVEL on a common supply manifold
- Common compressed air supply via common supply manifold

Note

On the common supply manifold, vacuum generators with an additional port for the ejector pulse (OVEL-...-Z-C-A) cannot be combined with vacuum generators without an additional port (OVEL-...-C-A).

Note

Combined allocation with OVEL-5 and OVEL-7/-10 is possible only with common supply manifolds OABM-...-15.

Use mounting kit OABM-MK for mounting the OVEL on the common supply manifold.

Min. tightening torque: 0.3 Nm

Max. tightening torque: 3.3 Nm

If the devices are subject to usage restrictions in residential, commercial or light-industrial environments, further measures for the reduction of the emitted interference may be necessary.

Input signal/measuring element

Type	SPTe-V1R	SPTe-B2R
Measured variable	Relative pressure	
Measurement method	Piezoresistive pressure sensor	
Pressure measuring range start value [bar]	0	–1
Pressure measuring range end value [bar]	–1	1
Max. overload pressure [bar]	5	5
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]	
Note on the operating/pilot medium	Lubricated operation possible	
Temperature of medium [°C]	0 ... 50	
Ambient temperature [°C]	0 ... 50	

Output, general

Accuracy ±FS ¹⁾ [%]	3 (at room temperature of approx. 23 °C) 4 (in ambient temperature range 0 ... 50 °C)
Repetition accuracy ±FS ¹⁾ [%]	0.3
Temperature coefficient ±FS/K ¹⁾ [%]	0.05

1) % FS = % of the measuring range (full scale)

Analogue output

Type	SPTe-...-V-2.5K	SPTe-...-B-2.5K
Analogue output [V]	0 ... 10	1 ... 5
Rise time [ms]	1	
Min. load resistance of voltage output [kΩ]	15	

Accessories

Output, additional data		
Short circuit current rating	For all electrical connections	
Electronics		
Type	SPTE-...-V-2.5K	SPTE-...-B-2.5K
Operating voltage range DC [V]	18 ... 30	10 ... 30
Reverse polarity protection	For all electrical connections	
Electromechanics		
Electrical connection	Cable, 3-core, open end	
Cable length [m]	2.5	
Mechanical components		
Type of mounting	Pin-type connection	
Mounting position	Any	
Pneumatic connection	Cartridge 10 mm	
Product weight [g]	35
