

Valve series VOFC

FESTO

Characteristics

General										
The valves of series VOFC are special 3/2-way and 5/2-way valves for process automation and applications in chemical and petrochemical installations, where they are frequently used as pilot valves for butterfly valves and actuators. Their sturdy		design and high resistance to corrosion make these valves suitable for outdoor use under harsh ambient conditions. With the flange pattern to NAMUR, the solenoid valves are particularly suitable for quarter turn actuators.	The integrated spring chamber re-breather function protects quarter-turn actuators with spring return (single-acting cylinders and actuators) against contaminated ambient air and weather conditions such as rain.	With German Technical Control Board (TÜV) report up to SIL3						
Function, design		Sturdy	Flexible functionality	Economical						
3/2-way or 5/2-way, single or double solenoid, depending on the type - Pilot-actuated piston spool and poppet valves		The surface of the valve housing is Ematal-coated. This treatment involves converting the aluminium surface into a very hard aluminium oxide layer with titanium oxide deposits, which makes the valves extremely resistant to wear and abrasion and gives them first-class sliding qualities. This provides optimum protection against atmospheric and chemical influences. You can find information on the media resistance of the product at → www.festo.com.	- Changeover between internal and external pilot air via automatic OR valve - Suitable for vacuum	Connection pattern to NAMUR for direct mounting on the actuator and G and NPT threaded connections in a valve housing						
Ordering data – Product options										
		Configurable product This product and all its product options can be ordered using the configurator.	The configurator can be found under Products on the DVD or at → www.festo.com/catalogue/...	<table><tr><th>Part no.</th><th>Type</th></tr><tr><td>3344863</td><td>VOFC-L</td></tr><tr><td>2868687</td><td>VOFC-LT</td></tr></table>	Part no. 2868687	VOFC-LT									

Characteristics

VOFC – Basic valves

- 3/2, 5/2-way valves
- Connections G1/4, 1/4 NPT, G1/2, 1/2 NPT, flanged connections
- Connection pattern to NAMUR, optionally with P duct

→ Page 7

VACC – S13 coils

- AC and DC voltage 24 V, 60 V 110 V, 230 V
- CE marking (see declaration of conformity) to EU Explosion Protection Directive (ATEX)

→ Page 55

VOFC – Accessories

- Throttle plate
- Sub-base
- Mounting plate
- Connection set
- Adapter with filter
- Mounting bracket
- Manual override

→ Page 47

Peripherals overview

Peripherals overview

Mounting components and accessories		Brief description	→ Page/Internet
[1]	Basic valve VOFC-LT-...-FG12-...-F19...	3/2-way valve, connection G1/2, poppet valve → modular product system – can be configured using the online configurator	2
[2]	Basic valve VOFC-L-...-FG14-...-F19...	3/2-way valve, connection G1/4, piston spool → modular product system – can be configured using the online configurator	2
[3]	Basic valve VOFC-LT-...-FG14-...-F19...	3/2-way valve, connection G1/4, poppet valve → modular product system – can be configured using the online configurator	2
[4]	Directional control valve VOFC-L-...-SG14/SN14-...	3/2-way valve, 5/2-way valve, connection G1/4, piston spool → modular product system – can be configured using the online configurator	2
[5]	Manual override VAOH-MB-S7-S13	Manual override (MO)	54
[6]	Solenoid coil VACCS13-...3A	Type of ignition protection iA = intrinsically safe, for use in zone 1	55
[7]	Solenoid coil VACCS13-...ME	Type of ignition protection ME = encapsulated, for use in zone 1	55
[8]	Solenoid coil VACCS13...A1	IP65, electrical plug pattern type A to DIN EN 175-803	55
[9]	Sub-base VABS-S7-RB-B-...14-V14-A	For mounting two solenoid valves for redundant circuitry, with flange 1/4, connection pattern to NAMUR	47
[10]	Sub-base VABS-S7-BE-B-...14-V14-A	Pressurisation and exhaust block, with flange 1/4, connection pattern to NAMUR	47
[11]	Throttle plate VABF-S7-F1B5P1-F	Exhaust air throttle plate for NAMUR interface for installation between the solenoid valve and single-acting actuators	50
[12]	Throttle plate VABF-S7-F1B1P2-F	Exhaust air throttle plate for NAMUR interface for installation between the solenoid valve and double-acting actuators	50
[13]	Sub-base VABS-...	Sub-base for NAMUR interface for installation between the solenoid valve and actuators. Interface solenoid valve: VDI/VDE 3847. Interface actuator: VDI/VDE 3845.	51
[14]	Connection set VABF-S7-S-G14	Mounting plate for attaching the valve to the NAMUR rib	50
[15]	Mounting plate VAME-S7-P	Mounting plate for attaching the valve to the NAMUR rib	49
[16]	Mounting bracket VAME-S7-Y	Alternative (instead of screw) for mounting the valve on a NAMUR rib using a mounting bracket	53
[17]	Adapter NPFV-AF-...-MF	Adapter with filter	53
[18]	Exhaust protection VABD-D3-SN-...	Exhaust protection to IP65. The spring chamber of the solenoid valve is protected against the ingress of aggressive ambient air and water by the one-way flow control system	53

Type codes for VOFC

Data sheet – Modular system, piston spool valves

Valve functions		
Circuit symbol	Type code	Description
The circuit symbol shows a 5/2-way double solenoid valve. It has two solenoid coils at the top, labeled 14 and 12. The valve has five ports: 4 (top left), 2 (top right), 5 (bottom left), 1 (bottom center), and 3 (bottom right). The symbol indicates that the valve is electrically piloted, non-reversible, has an internal pilot air supply, and does not have a manual override (MO).	VOFC-L-B52-G14-... VOFC-L-B52-N14-...	5/2-way double solenoid valve • Electrically piloted • Non-reversible • Internal pilot air supply • Without manual override (MO)
The circuit symbol is identical to the first one, but it includes a manual override (MO) feature, represented by a small rectangle on the top of each solenoid coil.	VOFC-L-B52-H-G14-... (MO non-detenting) VOFC-L-B52-H-N14-... (MO non-detenting)	5/2-way double solenoid valve • Electrically piloted • Non-reversible • Internal pilot air supply • With manual override (MO)
The circuit symbol is identical to the first one, but it includes a NAMUR connection feature, represented by a small rectangle on the top of each solenoid coil.	VOFC-L-B52-FG14-... VOFC-L-B52-FN14-...	5/2-way double solenoid valve • Electrically piloted • Non-reversible • Internal pilot air supply • With NAMUR connection • Without manual override (MO)
The circuit symbol is identical to the first one, but it includes both a manual override (MO) and a NAMUR connection feature, represented by small rectangles on the top of each solenoid coil.	VOFC-L-B52-H-FG14-... (MO non-detenting)	5/2-way double solenoid valve • Electrically piloted • Non-reversible • Internal pilot air supply • With NAMUR connection • With manual override (MO)

The technical drawing shows two views of a 3/2-way valve. The front view (left) shows a rectangular body with two ports (1 and 2) and a solenoid (3) on top. Dimensions include B1 (body width), B2 (solenoid width), H1 (total height), H9 (height to port center), H10 (height to solenoid center), D1 (port diameter), D5 (solenoid diameter), H4 (height to port center), H5 (height to solenoid center), T2 (port thread), and H7 (height to port center). The side view (right) shows the valve from the side, with dimensions L1 (total length), L2 (body length), L4 (body length), L5 (solenoid length), H2 (height to port center), H3 (height to solenoid center), H12 (height to port center), and D2 (port diameter).

Throttle plate for single-acting actuators

Throttle plate material: Ematal-coated aluminium
Seals material: NBR
RoHS-compliant
PWIS conformity:
VDMA24364 zone III
Operating medium: Compressed air to ISO 8573-1:2010 [7:-:-]
Operating pressure: 0 ... 12 bar
Pilot air supply: internal/external
Mounting position: any
Mounting: via through-hole
Degree of protection: IP65 (when installed)

Function:
Flow control for supply air and/or exhaust air for an actuator with NAMUR interface for valves VOFC/VOFD

Accessories

Encapsulated solenoid coil with increased safety, Ex-me, VACC-S13-...						
	Nominal operating voltage	Characteristic coil data	Explosion prevention and protection	Certification	Part no.	Type
	60 V DC and 60 V AC	60 V AC: 40/65 Hz, power 1.8 VA, 60 V DC: 1.8 W	Zone 1 (BR), zone 21 (BR)	INMETRO (Ex certification Brazil, EPL Gb and Db)	8118328	VACC-S13-18-K4-27U-NM4ME
	60 V DC and 60 V AC	60 V AC: 40/65 Hz, power 1.8 VA, 60 V DC: 1.8 W	Zone 1 (CN), zone 21 (CN)	CCC-Ex (Ex certification China, EPL Gb and Db)	8118333	VACC-S13-18-K4-27U-NE4ME
			Zone 1 (KR), zone 21 (KR)	KOSHA (Ex certification Korea, EPL Gb and Db)	8156763	VACC-S13-18-K4-27U-KS4ME
			Zone 1 (ATEX), zone 1 (IEC-EX), zone 1 (UKEX), zone 2 (ATEX), zone 21 (ATEX), zone 21 (IEC-EX), zone 21 (UKEX), zone 22 (ATEX)	Without	8109400	VACC-S13-18-K4-27U-EX4ME

Solenoid coil intrinsically safe Ex-ia, VACC-S13-11-...						
	Nominal operating voltage	Characteristic coil data	Explosion prevention and protection	Certification	Part no.	Type
	24 V DC	14-32 V DC: 0.22 - 1.1 W	Zone 1 (ATEX), zone 1 (IEC-EX), zone 1 (UKEX), zone 2 (ATEX), zone 21 (ATEX), zone 21 (IEC-EX), zone 21 (UKEX), zone 22 (ATEX)	Without	8109401	VACC-S13-11-K4-1-EX4A
			Zone 1 (BR), zone 21 (BR)	INMETRO (Ex certification Brazil, EPL Gb and Db)	8114078	VACC-S13-11-K4-1-NM4A
			Zone 1 (CN), zone 21 (CN)	CCC-Ex (Ex certification China, EPL Gb and Db)	8114135	VACC-S13-11-K4-1-NE4A

Solenoid coil for armature system F19, VACC-S13-18-...						
	Nominal operating voltage	Characteristic coil data	Certification	Electrical connection	Part no.	Type
	24 V DC	24 V DC: 2.1 W	Without	Plug type A, to EN 175301-803	562889	VACC-S13-18-A1-1
	24 V DC and 24 V AC	24 V DC: 2.1 W, 24 V AC: 50/60 Hz, power 2.1 VA			562890	VACC-S13-18-A1-1U
	110 V DC and 110 V AC	110 V DC: 1.8 W, 110 V AC: 50/60 Hz, power 1.8 VA			562891	VACC-S13-18-A1-2U
	230 V DC and 230 V AC	230 V DC: 1.8 W, 230 V AC: 50/60 Hz, power 1.8 VA			562892	VACC-S13-18-A1-3U
