Adaptive shape grippers DHEF

FESTO

At a glance

Several gripping benefits are combined in a single model:

- Gripping parts with undefined positions and shapes
- Form-fitting gripping of products with different geometries
- Form-fitting gripping with suction cup effect
- Gentle gripping of delicate products of varying sizes

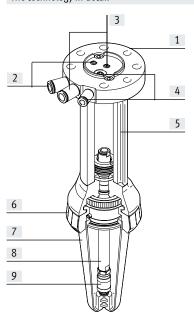

Sensor technology:

· Position sensing possible with position transmitters and proximity sensors

Applications:

- Human-robot collaboration thanks to gripper without edges
- Unpacking of boxes as well as separation and positioning of parts
- · Picking parts and magazining

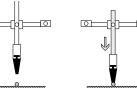

The technology in detail

- [1] Direct mounting via through-hole suitable for DIN ISO 9409-1-50-4-M6 (industrial robots - mechanical interfaces)
- [2] Compressed air supply port for retracting
- [3] Compressed air supply port for advancing
- [4] Compressed air supply port for inverting cap
- [5] T-slot for mounting the sensors (both sides)
- Bayonet lock [6]
- [7] Inverting cap
- Piston rod
- Releasing ring for replacing the inverting cap

Control variant

Positioning

• Move the tip of the inverting cap to

• The inverting cap is supplied with

0.07 ... 0.1 bar via a pressure

Gripping

cap is retracted

ject to be gripped until the inverting

supply port for retracting in order to

• Pressurise the compressed air

hold the object in place

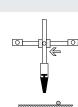

· Move to the placement position

Moving

Placing

- · Exhaust the compressed air supply port for retracting • The object to be gripped is released
- Move the shape gripper away from the object
- · If the shape gripper does not release the object it has gripped, the compressed air supply port for advancing will have to be pressurised

The drive is exhausted

the object to be gripped

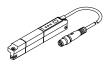

Note

regulator

The gripper variant with robot connection DHEF-...-RA1 makes it possible to integrate the gripper into the robot control system directly and easily. A software plug-in is provided for this purpose.

Position sensing

With position transmitter SDAT-MHS

- Analogue position feedback possible
- Analogue output
 - 4 ... 20 mA

Choice of two operating modes:

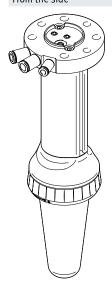

- Two adjustable switching outputs
- IO-Link

With position transmitter SMAT-8M

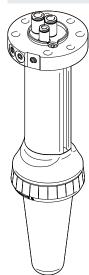

- Analogue position feedback possible
- Analogue output
 - 0 ... 10 $\rm V$

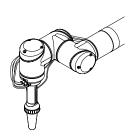

Compressed air supply ports

From above

Fast and intuitive integration on a robot arm

The gripper with robot connection DHEF-...-RA1 enables fast integration on a light-weight robot.

In order to mount the gripper on the robot arm, the necessary accessories are included in the kit, in addition to the gripper itself.

The plug-in is a simple means for integrating the gripper directly into the program sequence of the robot control system $(\rightarrow page 6)$.

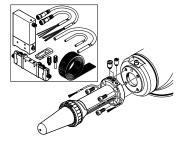

Note

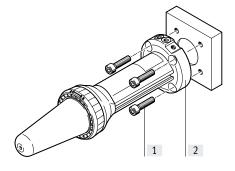

The gripper with robot connection DHEF-...-RA1 is only compatible with the following robots:

- Universal Robots UR3/UR5/UR10: from software version PolyScope CB 3.8.0
- Universal Robots UR3e/UR5e/UR10e/UR16e: from software version PolyScope SW 5.2.0

For additional information \rightarrow www.festo.com/sp

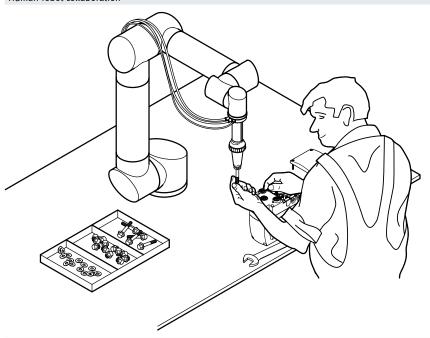

Mounting options

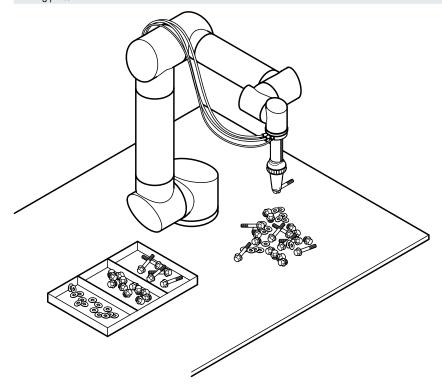

- [1] Retaining screws
- [2] Direct mounting via through-hole suitable for DIN ISO 9409-1 50-4-M6 (industrial robots mechanical interfaces)

Application examples
Human-robot collaboration

Peripherals overview

Peripherals overview

Acces	sories		
	Туре	Description	→ Page/Internet
[1]	Push-in fitting QSM, QSMLV	For connecting compressed air tubing with standard O.D.	13
[2]	One-way flow control valve GRLA	For regulating speed	12
[3]	Proximity sensor SMT-8	For position sensing	12
	Position transmitter SDAT, SMAT, SDAS	For detecting the current position	13
[4]	Inverting cap DHAS	Included in the scope of delivery of the shape gripper; can be reordered as an accessory	12
[5]	Precision pressure regulator LRP	For manually regulating the operating pressure of the inverting cap	12
[6]	Proportional-pressure regulator VEAB	For electronically regulating the operating pressure of the inverting cap	12

System product for robot connection

If the feature DHEF-...-RA1 is used, the delivery includes all the connection components in addition to the gripper:

5

6

- Proximity sensors
- Valve and pressure regulator
- Connecting cables
- Tubing for connecting the gripper
- QS fittings and silencers
- Velcro strip for fixing the connecting cables and tubing in place
- Mounting screws
- USB memory stick for software plug-in

Ordering data → page 11

Type codes

001	Series		003	Position sensing	
DHEF	Adaptive shape gripper		Α	For proximity sensor	
	Le				
002	Size				

The technical data is valid for the following conditions:

- Object to be gripped: steel ball
- Diameter: 30 mm
- Weight: 390 g
- Smooth, lathed surface

The values may differ if another type of object needs to be gripped.

Sharp-edged objects can affect the service life of the inverting cap.

General technical data		
Design		Inverting cap
		Force-guided motion sequence
Inverting cap version		Standard
Mode of operation		Double-acting
Gripper function		Adaptive
Guide		Basic guide
Stroke	[mm]	66
Pneumatic connection		M5
Max. operating frequency	[Hz]	1
Position sensing		Via proximity sensor and position transmitter
Type of mounting		To ISO 9409
Mounting position		Any
Diameter to be gripped	[mm]	12 38
Permissible dynamic transverse load with max. cantilever	[N]	2.3
Mass moment of inertia	[kgcm ²]	1.29
Guide value for payload	[kg]	1

Operating and environmental conditions						
Operating pressure of drive	[bar]	18				
Operating medium		Compressed air to ISO 8573-1:2010 [7:4:4]				
Note on operating/pilot medium		Operation with lubricated medium not possible				
Ambient temperature ¹⁾	[°C]	0+60				
Corrosion resistance class CRC ²⁾		2				
Operating pressure of cap	[bar]	0.07 0.1				
Nominal pressure of cap	[bar]	0.08				
Burst pressure of cap	[bar]	0.3				
Recommended min. flow rate for pressure regulator ³⁾	[l/min]	10				
Robot compatibility with variant DHEFRA1		Universal Robots UR3/UR5/UR10: from software version PolyScope CB 3.8.0				
		Universal Robots UR3e/UR10e/UR10e: from software version PolyScope SW 5.2.0				

- 1) Note operating range of proximity sensors
- 2) Corrosion resistance class CRC 2 to Festo standard FN 940070
- Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.
- 3) Theoretical guide value during operation of the drive at nominal pressure (6 bar) without an object being gripped. The inverting cap must not be overstretched during gripping and has to be checked for every gripping application. It may be necessary to restrict the speeds.

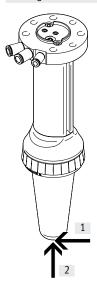

Weight [g]					
Product weight	475				
Inverting cap	18				
Moving mass without inverting cap	60				

Materials				
Housing Anodised aluminium				
Inverting cap	VMQ (silicone)			
Locking cover	Polyamide			
Note on materials	Contains paint-wetting impairment substances			
	RoHS-compliant			
Suitability for use in the food industry	See supplementary material information			

Forces and impact energy				
Drive force at 6 bar	·			
Retracting	[N]	158		
Advancing	[N]	189		
Contact force on object to be gripped ¹⁾	[N]	20		
Max. holding forces				
Parallel to the gripper axis	[N]	26		
Perpendicular to the gripper axis	[N]	45		
Max. impact energy at the end positions	[J]	0.1		

¹⁾ In unpressurised state

Holding force

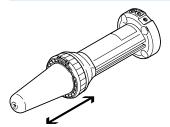

- [1] Holding force perpendicular to the gripper axis
- [2] Holding force parallel to the gripper axis

Max. speeds [mm/s]	
Without object	290
For picking up object	1201)

¹⁾ The shape gripper must be throttled

Retracting and advancing times [ms]

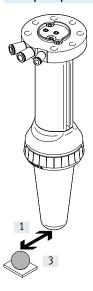

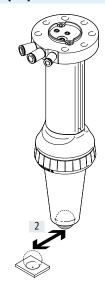

The specified retracting and advancing times [ms] are valid for the following conditions:

- Operating pressure of 6 bar
- Horizontal mounting position
- Without gripped object

Retracting	290
Advancing	270

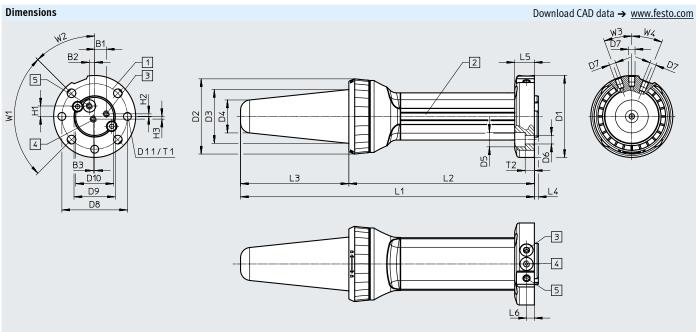

Pick-up and placement tolerances [mm]

- [1] Pick-up tolerance
- [2] Placement tolerance
- [3] Object to be gripped

Pick-up tolerance	±4
Placement tolerance	±2

- [1] Mechanical interface/mounting flange suitable for DIN ISO 9409-1-50-4-M6 (industrial robots mechanical interfaces)
- [2] T-slot for mounting the sensors (both sides)
- [3] Compressed air supply port for retracting
- [4] Compressed air supply port for advancing
- [5] Compressed air supply port for inverting cap
