

# CERTIFICATE OF CONFORMITY

According to Regulation 1935/2004 Article 3 it is required that food contact articles “must be sufficient inert to preclude substances from being transferred to food in quantities large enough to endanger human health or to bring about an unacceptable change in the composition of the food or a deterioration in its organoleptic properties”.

This is to certify that all Piab suction cups in transparent silicone are produced from a material that complies with the Recommendation XV and will not violate article 3 of the Regulation EC1935/2004.

The material has been tested for extraction and migration limits by an independent testing organization (Innventia AB, Stockholm, Sweden) using test method EN 1186- 14 and has met requirements according to commission regulation EC 10/2011.

The above product is also produced according to EC regulation 2023/2006 “Good manufacturing practice for materials and articles intended to come into contact with food”.
