

# PILOT 2K Bonding

The **PILOT 2K Bonding** is used in various industries. The gun is recommended wherever the highest demands are placed on application and effectiveness.

The PILOT 2K Bonding provides high-quality components for outstanding surfaces. It is ideal for a wide range of applications with 2-component dispersion adhesives.

## Advantages at a glance

- ✓ All parts that come into contact with material are made from stainless steel
- ✓ Easy to use
- ✓ High flexibility of use thanks to rotating wide jet air cap
- ✓ All consumables can be quickly replaced
- ✓ Fine volume control for B-component

## Available nozzle range

ROUND JET AIR CAP (A-COMPONENTS)		Ø	
0.8mm	V 11821 0		083
1.0mm	V 11821 0		103
1.2mm	V 11821 0		123
1.4mm	V 11821 0		153
WIDE JET AIR CAP (A-COMPONENTS)		Ø	
0.8mm	V 11820 0		083
1.0mm	V 11820 0		103
1.2mm	V 11820 0		123
1.4mm	V 11820 0		153

Nozzle size hole for the B-components

Ø	mm Ø	0.3	0.4	0.5
	no.	3	4	5

## Technical data

Feature	Data
Nozzle size	Ø 0.8 - 1.4 mm (depending on the application)
Nozzle size for B-components	Ø 0.3 - 0.5 mm (depending on the application)
Material wetted parts	Stainless steel
Weight	550 g

## Uses

- Foam manufacturing
- Mattress adhesion
- Soft-finishing industry (desk, dining and conference chairs, sofas)
- Automotive industry
- Seats for buses and rail transportation

## Accessories

**Hose package:** 5m, 2K dispersion

V 87 005 55 060

**Set of 5 hoses for B-component:** For connecting the air cap to the shuttle

V 87 005 55 061

**Nozzle and needle set:** made up of material nozzle and needle

V 15 815 00 Ø 3

**Repair set (without air cap):** made up of nozzle and needle set and all consumables

V 16 815 00 Ø 3
